

Solve the complex problem of managing mixed cargo

Are you looking to attract more shippers to your port, to compete head on for business with bigger, better funded port operations? Master Terminal™ from Jade Logistics can be your game changer, enabling you to simplify operations and transform productivity.

A terminal operating system (TOS) for the agile port

The Master Terminal TOS solves the complex problem of managing a variety of cargo within one system, providing the agility you need to compete. Unlike most solutions available today, Master Terminal has been designed to cater for all cargo types including containers, break-bulk, bulk, general cargo, Roll-On/Roll-Off (RORO), vehicles and logs, making it the TOS of choice for mixed cargo terminals.

Master Terminal is a powerful, easily configurable TOS accessible via Windows thin clients, the Internet, and mobile devices. It provides a single integrated, real-time view of all operations and data, allowing you to make decisions smarter and faster, resulting in improved productivity and operational efficiency.

Master Terminal features:

- Single integrated platform to manage core terminal operating processes
- Handles multiple cargo types
- Operational planning including harbor, yard and vessel management
- Strong integration capabilities via EDI and APIs
- Financial data and invoicing support
- Accessible via Windows thin clients, the Internet, or mobile devices
- Configured to reflect a port's specific challenges
- Backed by a team with a long history in the ports and shipping sector

An extremely stable solution capable of forming the core of your port's information systems, Master Terminal is flexible enough to meet your port's specific challenges.

Go live with confidence

Our proven implementation methodology has been developed with your needs in mind, providing an easy to follow implementation path with considerable guidance for your teams to deliver a successful Go Live. Our customized training solutions ensure your users are rapidly up to speed and able to make the most of the Master Terminal solution. With our on-site support at key points throughout the project, and an implementation record second to none in the industry, you can be assured that Master Terminal will be implemented with minimal disruption to your operations.

We are port people

Master Terminal is backed by a dedicated team with considerable experience in the global logistics industry, and unique expertise in container terminal, RORO, warehousing, container freight services, and general cargo management.

24 x 7 Support

Our support service is unique in the logistics industry. Master Care is more than just a helpdesk. Master Care is a comprehensive managed service that combines traditional 24x7 technical support with continuous live monitoring and active management of your installation, lifetime product maintenance, security monitoring, and resource usage analysis and capacity planning. With Jade Logistics' experienced team maintaining nearly every aspect of your TOS server environment, you can be sure that your TOS remains available, reliable and secure. You will gain maximum benefit from a lower total cost of ownership.

Transform your business

For the growing, ambitious port, Master Terminal helps you compete hard for a shipper's business, no matter what port you are up against.

In one of the world's toughest industries, Master Terminal is the terminal operating system (TOS) that solves the complex problems of handling a variety of cargo types and gives you the ability to transform your operations and compete for new business.
